Project Title	**A Blockchain based Solution to Know Your Customer (KYC)**

Description of Project: **Know Your Customer for Banks**

KYC means Know Your Customer or sometimes Know Your Client. KYC check is mandatory process of identifying and verifying the client's identity when opening an account and periodically over time. In other words, banks must make sure that their clients are genuinely who they claim to be. KYC process includes ID card verification, face verification, document verification . This process also helps to ensure that banks service are not misused.

Banks play a crucial role in the proposed KYC chain application, that is of registering new users, validating their KYC details, modifying and updating their records. The modules are Registration module, Authentication module, updation and deletion Module.

Roles and Responsibility:

- Administrator: The Administrator(Admin) is a central financial entity who will have complete control over the complete control over the blockchain infrastructure.
- Banks: The Bank can enroll the number of users to the system. It is the responsibility of the bank to physically review the details before putting them on blockchain.
- Users: They will be able to read their KYC data in the system.

Front end and Backend Tools
